gofos™
Makes Fibers Greater

WHAT IS GOFOS™?

GOFOS™ is a soluble prebiotic non-digestible fiber, sweet and tasty short chain fructo-oligosaccharide (sc-FOS), consisting of about 95% purity.

GOFOS™ is produced from non-GMO beet sugar by a proprietary unique enzymatic process, leading to the formation of oligosaccharides content with fixed chain length of 3-5 units. sc-FOS is naturally found in small amounts in various vegetables and fruits.

sc-FOS soluble prebiotic fiber promotes the growth and activity of beneficial gut microbiota and helps maintain a healthy gut.
